Complementary Angles

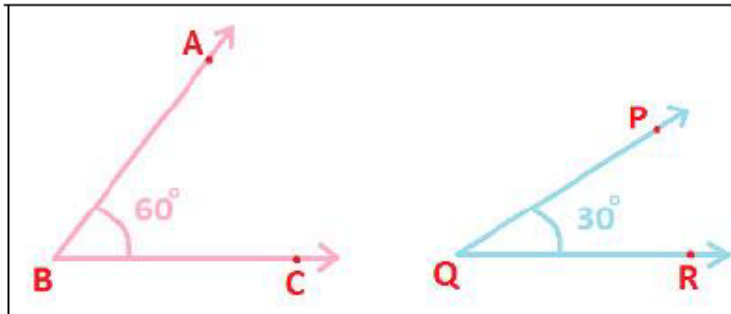

These angles have a sum of 90°.
They form a right angle.
$$m\angle ABC + m\angle PQR = 90°$$

<u>Definition of Supplementary/Definition of Complementary</u> – says that

- ✓ "If two angles are supplementary,
    then their measures add up to 180 degrees."

- ✓ "If two angles are complementary,
    then their measures add up to 90 degrees."
