

Definition of Supplementary/Definition of Complementary – says that

- ✓ “If two angles are supplementary,
then their measures add up to 180 degrees.”

- ✓ “If two angles are complementary,
then their measures add up to 90 degrees.”

Supplementary Angles

These angles have a sum of 180° .

They form a straight line.

$$m\angle ADC + m\angle CDB = 180^\circ$$
